Post Treatment Recommendations

1. Please avoid direct sunlight and if exposed, use sunblock SPF 30-50 regularly until next session. If there is irritation then apply every 2 hours as long as post-treatment irritation persists.
2. Avoid use of deodorants or fragrance on treated areas as long as skin is sensitive or fragile.
3. Mineral makeup (which is easy to remove) may be applied as long as the skin is not harmed.
4. Avoid hot baths, showers, saunas, hot tubs etc for 48 hours.
5. Maintain moisturization of the skin.
6. Between sessions, no mechanical trimming (waxing, tweezers, electrolysis, electric epilator) allowed.
7. Razors, scissors or depilatory creams are tolerated.
