Post Treatment Recommendations

During recovery period patients are recommended to use mild soap free cleanser that will not strip, irritate or leave heavy residue on the skin.

Use of non- active, non- occlusive and non- comedogenic nourishing and protective serums are recommended to be applied as often as necessary to reduce inflammation , restore skin comfort and accelerate healing process.

Hyla active, Anti- oxidant cocktail and vitamin rich repair are especially designed to enhance post- operative skin function. A gentle broad-spectrum sunscreen spf 30 that creates a breathable network over the complexion to conceal and perfect.

Cleanse AM& PM – Treat AM anti-oxidant cocktail plus vitamin repair plus cover recover. Treat PM Hyla Active plus vitamin rich repair.
